SELECT c.nama_kendaraan, b.nama_tipe, a.nama_jenis, d.nama_mesin FROM jenis a JOIN tipe b ON a.id_jenis=b.jenis_id JOIN tb_kendaraan c ON b.kendaraan_id=c.id_kendaraan JOIN mesin d ON b.mesin_id=d.id_mesin;

The screenshot shows the phpMyAdmin web interface. The left sidebar displays a database structure with a tree view. The main panel shows a SQL query executed successfully, displaying 5 rows of data. The query is: `SELECT c.nama_kendaraan, b.nama_tipe, a.nama_jenis, d.nama_mesin FROM jenis a JOIN tipe b ON a.id_jenis=b.jenis_id JOIN tb_kendaraan c ON b.kendaraan_id=c.id_kendaraan JOIN mesin d ON b.mesin_id=d.id_mesin`. The results table has columns: nama_kendaraan, nama_tipe, nama_jenis, and nama_mesin. The data rows are: Mobil 123s Manual Jepang, Mobil 321h Manual Jepang, Mobil 232i Matic China, Motor uer2 Matic China, and Motor 231h Manual China. The interface includes a top navigation bar, a left sidebar, and a main content area with a query editor and results table.

nama_kendaraan	nama_tipe	nama_jenis	nama_mesin
Mobil	123s	Manual	Jepang
Mobil	321h	Manual	Jepang
Mobil	232i	Matic	China
Motor	uer2	Matic	China
Motor	231h	Manual	China
